WATER EFFICIENCY NETWORK

GULF COAST/ MONTGOMERY COUNTY

The Gulf Coast/Montgomery County Water Efficiency Network is a coalition of water professionals, providers, agencies and interested members of the public. The group meets monthly to share information and promote water efficiency education, legislation, programs, technologies and other integral components of water conservation in order to have a regional impact on water supplies and use.

The network organizes the annual Gulf Coast Water Conservation Symposium, a one-day regional event aimed at providing elected officials, government managers, conservation staff and business leaders crucial information about effective business practices behind water conservation.
